PILOT AND LABORATORY SPINNING MACHINE

What is the Fiber-Tech Lab?

Fiber-Tech Lab is the most flexible and versatile pilot and/or laboratory spinning machine.

With its ergonomic desing, it provides hing qality yarn production with low energy costs.

FIBER-TECH LAB comes is 5 main configurations

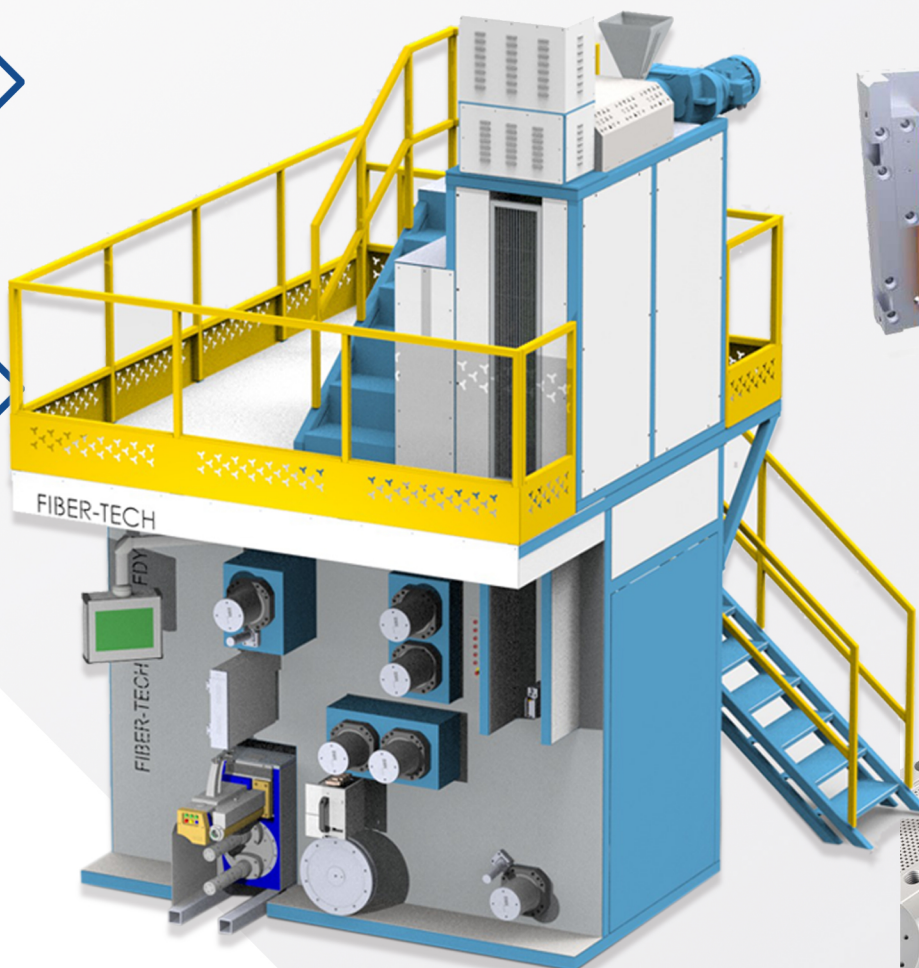

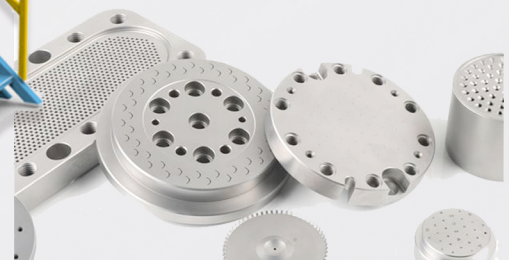

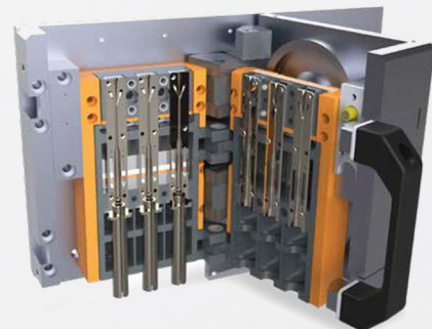

FIBER-TECH LAB1: suitable for POY

FIBER-TECH LAB2: suitable for POY,FDY

FIBER-TECH LAB2: suitable for POY,FDY,BCF

FIBER-TECH LAB2: suitable for POY,FDY,HTY

FIBER-TECH LAB2: suitable for POY,FDY,BCF Tricolor

Flexible in processing all type of yarns

The machine is available in many configurations depending from the yarn (type and denier range) to be produced. Machine can produce high speed products as POY,FDY,BCF,HTY.Flexible for color matching

The developed extruder allows a very fast color change with melt pump and spinbeam technology,ideal for efficient colour matching and colour development.

Custom made release

Fiber-Tech machine can be designed together with the customer according to customer needs.

Easy handling

Thanks to developed software and compact design, it can be operated by a single operator from 1 panel.

Flexible in processing raw materials

The machine is suitable to run all standard polymers(PET,Co-PET,PA,PP,PBT,PTT, PLA,ets.) Upon request can work with high performance and engineering polymers, resorbable polymers for medical sector.

Fiber-tech machines offer different production options such as Monocolor,Tricolor and Bicomponent.

Also the other machines that we have production ability;

- Spunbound
- Meltblown
- Monofilament

OUR COMPANY

BMK Birlik Makine is the only company in the sector operating in Turkey since 2005. Our company has become a solution partner of the yarn manufacturers in the Global textile sector by combining its experience and knowledge accumulated with the advanced technology and expert staff.

Our company's main fields of activity include spinneret component, melt pumps, textured volume groups for CF, BCF yarn and non-woven fabric production.

Generating alternative solutions to the emerging problems in the sector with the R&D works we carry out, our firm makes more mention of its name every day in Turkey and in the world.

**We Produce With
20 Years of Experience**

BMK BİRLİK MACHINE MOLD INDUSTRIES AND TRADE LLC.
